Check here if you have taken the area exam before:

Name one or more research areas in which you feel professionally competent, i.e., numerical algorithms, AI vision, concurrent programming, parallel architecture, etc.

Optional: Suggest one or more topics (not specific papers) on which you would be interested in being examined. (These are for guidance of the Area II Committee in assigning the examining committee. The final selection of papers will be made by the examining committee in consultation with you.)

3.

Have you satisfied your core requirement?

Current research supervisor:

Current research topic:

Optional: List Area II research supervisors (other than your current supervisor) whom you would like to have on your examining committee. Try to include at least one member of the Area II Committee.
