

Bibliography 26.

Computer Sorting

RONALD L. RIVEST AND DONALD E. KNUTH
Stanford University, Stanford, California

THIS BIBLIOGRAPHY on computer sorting contains all the references we have been able to locate on the subject. The only references excluded from this listing are manufacturers' documents and bulletins, except those of historical interest, and certain material that is not generally available. We did not search diligently in the patent literature.

TOPICAL INDEX

General surveys:

4	56	77	122	146	184	208	258
5	57	79	123	147	187	210	287
11	62	93	124	157	190	212	300
20	63	103	125	158	195	227	
33	67	113	131	161	196	242	
54	68	119	136	180	199	255	

Bibliographies and glossaries:

1	180
2	195
161	208

Historical material

(see also external sorting by balanced merging):

6	58	141	210
12	69	179	238
49	120	180	270
55	140	207	281

Internal sorting:

By selection

45	84
80	170
81	290

By insertion (including 'Shellsort')

34	203	234
87	209	241
150	219	262
160	223	289
183	225	292

By exchange (including 'Quicksort')

36	134	151	252	261	284
39	137	197	257	267	285
89	138	201	259	268	
90	139	217	260	283	

By distribution or address calculation

75	101	166	203
76	102	185	279
100	159	189	293

By merging

35	219	296
86	294	
120	295	

By networks

3	15	37	171
13	16	82	172
14	17	135	224

Other topics

39	165	254
64	198	277
132	253	

External sorting:

By distribution

19	163	222
23	192	280
97	218	301

Replacement selection

66	96	145
91	109	178
95	112	215

Balanced merging

47	104	156	206	245	264
69	106	164	214	247	270
72	128	167	230	250	282
92	140	200	240	256	

Polyphase and cascade merge

25	51	99	202	213	237
44	52	116	204	233	243
46	73	162	205	235	246
50	98	177	211	236	263

Oscillating sort

21	116	273
112	266	

Disk and drum considerations

8	71	115	176	248
27	74	148	181	
60	108	149	221	

Other topics

7	92	133	268	297
42	105	182	286	298
59	110	226	291	299

Theory of optimum sorting:

3	83	129	173	216	269
26	85	130	174	220	271
43	88	152	175	228	272
52	94	153	186	229	275
65	126	154	191	231	276
82	127	155	193	249	288

Patents:

9	41	114	142	215
10	48	117	143	265
22	61	118	144
